PARTNER PROFILE

Let's build together.

Serguei Poppeleer · Engineer · Contracts · Operations

“No one delivers alone. The best projects run on trusted networks.”

WHO I AM

I craft the processes that help organisations adapt across borders and industries.

20+ years on infrastructure, energy, real estate and retail projects across Europe, Africa, the Gulf and Asia — as engineer, contract specialist, operations manager and team builder.

WHY A NETWORK

Clients need the right expert, in the right place, in their language — fast. No single firm has all of it.

I bring the clients, the structure and the method. Partners bring the depth and the ground.

WHO I'M LOOKING FOR

Specialists

Contract managers, quantity surveyors and construction lawyers who want steady, well-scoped work on international construction and EPC projects.

YOU GET
Work passed on to you, a team behind you, the client relationship handled.

Firms on the ground

Architects, project managers, fit-out contractors and property agents who deliver locally for companies arriving from abroad.

YOU GET
International clients, briefed and ready — with one clear point of contact.

Platforms & events

Event organisers, associations and media looking for a speaker, panelist or co-host on project delivery and frontier markets.

YOU GET
Field-tested content and a speaker who works in English or French.

HOW IT WORKS

1 Intro call
20 minutes. Who you are, what you do best, where you work.

2 Agree the terms
Scope, roles and fees set out clearly, before any client work.

3 First project
Start with one well-defined job. Learn how we work together.

4 Grow
Repeat what works. Partners who deliver get the next one first.

HOW I WORK WITH PARTNERS

- One client contact — no one gets lost
- Clear scope before work starts
- Fair terms, agreed upfront
- Client confidentiality, always
