SPEAKER PROFILE

Serguei Poppeleer.

Engineer · Contracts · Operations

“Fix the system. Before the project does it for you.”

ABOUT

Projects don't fail. The systems around them do. Frontier markets just expose it faster.

Serguei crafts the processes that help organisations adapt across borders and industries. He has spent 20+ years across 30+ countries watching the same pattern: governance that looks right on paper, delivery that unravels on site.

On a remote camp build in Central Africa he rebuilt delivery around ground reality, local entrepreneurs and the community — **done in 6 months instead of 12, at one-tenth of the cost, zero security incidents.** That pattern became the 5Cs Framework™.

KEYNOTE

No-Surprises Delivery

Why projects don't fail — the systems around them do

Even with templates, stage gates and reports, projects drift: scope shifts, governance disconnects from how work gets done, and supplier slippage turns delivery into a constant chase. Serguei shows how to make controls match reality — so teams enforce decisions rather than argue them.

01 Predictable delivery — say with confidence what's on track, what's not, and what you're doing about it.

02 A decision rhythm that closes issues in days, not weeks — clear owner, options and trade-offs.

03 Real control when milestones slip: cause → impact → recovery, executed, not just agreed.

04 Turn the project office into the control tower — not the paperwork function that gets blamed.

FORMATS

Keynote · 45–60 min · Panel / expert session · Workshop · half-day · Virtual

In English or French. Italian and Spanish on request.
